

Georgia Generating Station

FRANKLIN, GA

**LOCATION:**

2100 George Brown Road
Franklin, GA 30217

TYPE:

Natural Gas, Simple-Cycle Peaker

NOMINAL CAPACITY:

945 MW

COMMERCIAL OPERATION DATE:

Phase 1/2 - 2001/2002

DGC ROLE:

Ownership

DGC OWNERSHIP:

30%

Overview

The Georgia Generating Station is a 945-megawatt (MW), natural gas, simple-cycle, electric peaking generating station located in Heard County near Franklin, Georgia. Georgia consists of six General Electric (GE) Frame 7FA gas turbine generators used as a peaking facility, producing energy during periods of high demand (such as very hot or cold days). The plant also has the ability to generate power using fuel oil.

Indicative of DGC's commitment to protect the environment, a 44-acre wetland preservation area, including wood duck nesting boxes and heron nesting platforms, was established adjacent to Georgia.

Project Benefits

RELIABLE GENERATION:

Available to operate an average of 99.3 percent of the scheduled time over the past five years.

COMMUNITY AND THE ENVIRONMENT:

The plant provides 11 well-paying, fulltime jobs: and in 2017, paid approximately \$2.3 million in salaries and payments to local subcontractors and vendors.

4 National Safety Council Awards for 2017:

48 since 2003

2007 "Best of Best" Practices Awards in Operations & Maintenance from Combined Cycle Journal

2008 Heard County Business of the Year

Georgia Generating Station is owned by Tenaska Georgia Partners, L.P. which is comprised of affiliates of Diamond Generating LLC, Tenaska, and Tyr Energy, Inc. and JERA Co., Inc.

About Diamond Generating LLC

Diamond Generating LLC is a world-class independent power producer with a successful track record as a developer, owner, manager and operator of power generation assets across North America. Diamond Generating currently has ownership interest in 14 operating power generating facilities in the U.S. and Mexico, having total output capacity of approximately 7,800 MW, with net equity of 3,300 MW.
